ABOUT ME

Enthusiastic 24-year-old Junior Web Developer bringing a year of practical full-stack experience. Strong foundation in HTML, CSS, JavaScript, and modern frameworks/libraries like React, Vue.js, and Laravel. Committed to developing responsive and efficient web applications.

CAREER OBJECTIVES

Seeking a Junior Web Developer role to apply and expand my full-stack skills, with a strong ambition to become a proficient Full-Stack Developer and contribute to impactful web solutions.

EDUCATION

Vietnam National University of Science

Electronic Engineering and Information - GPA: 3.12

Hanoi, Vietnam

Oct 2020 - Jun 2024

TECHNICAL SKILLS

Programming Languages: PHP, Javascript, Java, Python

Backend Framework: Laravel, ExpressJs, Spring, Flask

Frontend Framework: Vue, React

ML Architectures: CNN, YOLO, Transformers(BERT, LSTM), RAFT

CSS Framework: Bootstrap, Tailwind Css, ElementUI, Ant Design

Database: MySQL, MongoDB, PostgreSQL

Tools Postman, Docker, AWS

Version Control Git, Github, Bitbucket

WORK EXPERIENCE

Intern Web Developer

CodLUCK Technology ., JSC, Duy Tan, Cau Giay

10, 2022 - 6, 2023

- A team of 2 people takes requests from instructors and plans to build them .
- Utilized Vue.js for the frontend development, creating interactive and user-friendly interfaces for e-commerce project.
- Implemented backend functionalities using Laravel, including user authentication, database management, and restful API development.
- Contributed to the project's success by delivering high-quality code, resolving issues promptly, and ensuring smooth communication within the team.

Web Developer

Kaopiz Software Co., Ltd, To Huu, Nam Tu Liem

9, 2023 - 2, 2024

- Primarily responsible for developing and maintaining backend functionalities for the ERP application, ensuring system performance and stability.
- Participated in the analysis of business requirements, database design, and the development of RESTful APIs to meet frontend and other system needs.
- Implemented user authentication and authorization solutions, ensuring data security and compliance with security regulations.
- Collaborated closely with cross-functional teams (frontend, testers, BAs) to ensure project progress and quality.
- Conducted unit testing and participated in integration testing to identify and resolve bugs.
- Researched and applied new backend technologies and development methodologies to enhance work efficiency.
- Provided support and resolved backend-related issues during application deployment and operation.

Web Developer

Amela Technology JSC, Me tri, Nam Tu Liem

4, 2024 - present

- As a Junior Developer, I contribute to the development of diverse web applications, including platforms for booking services, e-learning, and legal technology, primarily focusing on backend development using Laravel.

- Currently involved in developing and maintaining backend functionalities such as user authentication, database management, and RESTful API development for projects in the booking, e-learning, and legal domains.
- Independently develop and implement key backend features for various projects, including [mention a specific feature if possible, e.g., secure payment gateway integration for the booking platform, progress tracking for the e-learning system, document management for the legal tech application].
- Collaborate with senior developers to design scalable and efficient backend architectures tailored to the specific requirements of booking, e-learning, and legal applications.
- Take ownership of specific backend modules within different projects, ensuring seamless data flow and integration with frontend components.
- Apply knowledge of database design and API development to create robust and secure backend solutions for different industry needs (booking, education, legal).
- Actively participate in code reviews and contribute to maintaining high code quality across various project types.
- Continuously learning and applying new technologies and best practices relevant to web development in different sectors.

PROFESSIONAL PROJECTS

- **CRMStar (Kaopiz Software Co., Ltd)**
 - **Role:** Web Developer
 - **Team Size:** 6
 - **Techstack:** Laravel, VueJs, Mysql
 - **Key Responsibilities and Achievements:**
 - * Contributed to the development of the company's educational management product, utilizing technologies like Laravel, Vue.js, MySQL, and others.
 - * Successfully completed assigned tasks within deadlines, demonstrating a strong work ethic and commitment to learning.
- **E-learning (Amela Technology JSC)**
 - **Role:** Web Developer
 - **Team Size:** 5
 - **Techstack:** Laravel, Blade, HTML/CSS, Bootstrap 5, Mysql
 - **Key Responsibilities and Achievements:**
 - * Participated in the full lifecycle development of an online learning system from its initial stages.
 - * Implemented user-facing features including verification, face authentication, notification management, and lesson access.
 - * Developed comprehensive admin management functionalities to control and oversee the platform.
- **Website Booking Online Course(Amela Technology JSC)**
 - **Role:** Web Developer
 - **Team Size:** 7
 - **Techstack:** Laravel, Blade, HTML/CSS, Bootstrap 5, Mysql
 - **Key Responsibilities and Achievements:**
 - * Maintained and developed features for the online course booking website based on client feedback
 - * Implemented functionality for exporting invoices and receipts in PDF format.
 - * Modified and improved complex user interfaces dealing with large datasets for better usability.
 - * Conducted maintenance and optimization of the system through both code refactoring and database query tuning.
 - * Performed the release of new features and updates to the production environment for client.
- **Law Consultant Website(Amela Technology JSC)**
 - **Role:** Web Developer
 - **Team Size:** 12

- **Techstack:** Laravel, VueJS, Flask, Bootstrap 5, ElementUI, Mysql
- **Key Responsibilities and Achievements:**
 - * Developed APIs to facilitate data transfer to an AI model for learning purposes.
 - * Implemented the functionality for users to chat with the AI.
 - * Enabled the AI chatbot to provide responses based on data curated and provided by the website administrators.
 - * Focused on building robust and efficient API endpoints for seamless AI integration.
 - * Contributed to the development of an interactive AI-powered consultation feature for the website.

PERSONAL PROJECTS

- **Simple Movie Application**, A simple movie application has various functionalities like: Browse movie, search movie, view movie details. Data source: using The Movie Database (TMDB). [GitHub](#) [Live Demo](#)
- **Contact Management**, An application written by Laravel to manage user & company has various functionalities: Authentication, authorization, CRUD, search, soft deletes. [Github](#)
- **Larapics**, An application written by Laravel to post image like Pixabay. The application has some functionalities like: authentication, authorization, CRUD, like, download image, comment/reply, [GitHub](#)
- **Todo Application**, A similar application for newbie written by Laravel and Vue. [Github](#)
- **Brain Tumor Detection**, A group project in machine learning to detect and segment tumor in brain. Using architecture: CNN, Unet [Github](#)

CERTIFICATE

- Toeic - LR: 825
- APTIS: B2

HOBBIES

- Watch/play football
- Play video games
- Learn languages (currently learning Japanese)
